

## 74.6164 - Monitoring set with DPT-6003, single

### Product illustration

### Product description

1. System for filling the pressure monitoring set. It contains a non-vented macro drip chamber with a 15 µm fluid filter and a neutral roller clamp below. The spike of the drip chamber is assembled with a neutral protection cap. The tubing is made of PVC with the plasticizer TOTM. Dimensions: 1500 mm, 3.0/4.1 mm (ID/OD).
2. DPT-6003 – Disposable pressure transducer of the series DPT-6000 with a flush device which provides a continuous flow of 3 ml/h. In addition, the special design of the flush device allows performing a rectangular test to check the signal transmission of the system at any time. The neutral 3-way stopcock contains a red and vented cap for a comfortable zero-point calibration. The integrated splash-proof cable is made of PVC-free materials and ensures a permanently secure connection between the electrical accessory and transducer.
3. Pressure monitoring line with a standard bore and red colour coding to identify arterial applications. The tubing has a male and a female luer connector and is made of PVC with the plasticizer TOTM. Dimensions: 1200 mm, 1.5/2.98 mm (ID/OD), 2.12 ml (tube-volume).
4. Arterial extension with a red colour coded 4-way stopcock (360°) and a pressure monitoring line in patient direction. The sidearm of the stopcock is assembled with a neutral and unvented protection cap. The tubing is screwed to the male luer connector of the stopcock, has a standard bore and is made of PVC with the plasticizer TOTM. Dimensions: 150 mm, 1.5/2.98 mm (ID/OD), 0.27 ml (tube-volume).
