Article	Dispo-Resuscitator-Kit for adults, single use
---------	---

REF	84-10-195
-----	-----------

Content	PVC Resuscitation Bag 1500 ml with 40 cmH ₂ O pressure relief, built-in Reservoir Valve and palm holder, Face Mask #5, Reservoir Bag 2500 ml, 200 cm O ₂ Tubing, PEEP-Adapter 30 mm O.D.
---------	--

Description	<p>The resuscitation bag is an adjuvant for manual ventilation of patients who require resuscitation or temporary breathing support. Ventilation can be performed with air, or with oxygen if required.</p> <p>The pressure relief valve limits the ventilation pressure to 40cmH₂O.</p> <p>The Reservoir bag is connected to the intake valve of the ventilation bag and provides a contingent of air (or oxygen) which is applied during the intake stroke of the ventilation bag.</p>
-------------	---

Materials if available, Phthalate and its percental rate	Polyvinyl chloride (PVC): ventilation bag, reservoir bag, O ₂ -tubing, mask Silicone: membranes in patient valve, intake valve and relief valve Polypropylene (PP): mask connector Polycarbonate (PC): patient- and intake-valve housing, reservoir bag connector
