

HEMORRHAGE CONTROL

First Aid Kits

"After a traumatic injury, hemorrhage is responsible for over the 35% of pre-hospital deaths."

- The National Trauma Institute

The Emergency Bandage Kit

The Emergency Bandage® with additional Gauze or Gloves

This robust kit brings together the Gold Standard in Hemorrhage control, The Emergency Bandage® with an additional sterile gauze for cleaning and secondary dressing or with tactical, latex free, nitrile gloves. The 2BC kit has an innovative, comfortable and straightforward design.

T3

T3 - Tactical Trauma Treatment Kit

T3 bandage provides a multifunctional solution to wide range of injuries in a compact package. The bandage allows cleaning, coverage and compression of single and multiple wounds in addition to the treatment of conventional wounds, abdominal and large wounds, amputation, entrance/exit wounds and more.

This all-in-one bandage reduces the amount of equipment military personnel carry and is suitable for first aid combat emergency kits. The bandage is easily applied by untrained personnel and makes an ideal personal field dressing for every soldier.

MULTIFUNCTIONAL, INTUITIVE, ESSENTIAL

PerSys Medical® IFAK's contain the most crucial lifesaving equipment you'll need in a medical emergency situation. The kit's unique design enables versatile types and content of individual First Aid Kit from basic, tactical to professional.

4BC Kit

- Flexible
- Versatile
- Easy to use
- Lightweight
- Waterproof & Vacuum sealed
- Long shelf life

4BC Kit consolidates The Emergency Bandage®, a tourniquet, gauze and a glove set in a smart specially designed package. Those four essential items have proven to be very effective for the stopping of bleeding. The instruction for use of each item appears on the flexible package, enables the unprofessional user to choose the right item for the right occasion. 4BC content is versatile according to the user's professional level; it's suitable for home care, advance professionals and first responders. 4BC smart packaging technology has three separate pockets and a perforation which allows it to be split into two smaller bags.
