Technical Sheet

Secretion bag

Sterile

Reference(s)

Reference	Volume [ml]	Tubing Length[cm]	Sterility	Pack Factor
690615	1500	90	Sterile(EO)	100
690620	2000	90	Sterile(EO)	100

Description

Sterile Secretion Bag for collecting discharged body fluids, such as urine from Foley Catheters. The Bag is facilitated with an approximate graduation to offer visibility on urine output. Not intended for precise measurement.

It offers fluid collection of up to 1.5l or 2l depending on the version. The Bag is equipped with a gradual step connector and a non-return valve in order to prevent backflow into the bladder. The tube comes in a length of 90cm and an outer diameter of 6.5mm (+/-0.15mm). As the product is not equipped with a drainage valve, the secretion bag needs to be replaced after filling. Indwelling time up to 7 days. Not to be used in cases of in case of known hypersensitivity to the materials used

Main materials

Component	Material
Bag	PVC
Tube	PVC MT-202 Natural 80A

Pack factor

Single packaging

Packaging

Single sterile barrier system with protective packaging inside

Legal Manufacturer

CONOD Medical Co., Limited
