Technical Sheet

UROSID® 2000 S

Closed Urine Drainage System, sample port used with needle

Reference(s)

Reference	Volume Bag (ml)	Tubing Length	Cross Valve	Pack Factor
690090	2000	90	horizontal	25
690092	2000	90	vertical	25
690210	2000	120	horizontal	25
690212	2000	120	vertical	25

Description

Closed Urine Drainage System for safe collection of Urine. Following the recommendation of Robert Koch Institute, the UROSID® 2000 S offers a drip chamber with integrated Non-Return Valve (NRV) to separate the system into 2 closed sections, reducing the risk for the patient to develop a CAUTI (catheter associated urinary tract infection). The Drainage system offers urine collection up to 2.000ml. It comes with a hydrophobic coated Microfilter to secure the air ventilation while being impervious against bacteria and fluids.

The UROSID 2000 is facilitated with a sample port used with a needle. Recommended cannula size is max. 15G or 16G.

The clamp for closing the tube and the bed sheet clamp, to make sure the tube does not create any loops or kinks, are just an additional necessary feature. The tube comes with a star lumen and a reinforcement at the drip chamber to prevent kinking and the loss of urine flow. The variable length of either 90cm or 120cm is offering maximum flexibility. The tube outer diameter of 10mm (+/- 0.15mm) offers a maximum of urine flow.

The UROSID 2000 is equipped with a cross valve that is either horizontally or vertically positioned, to fit your special requirements. The urine bag holder plus an additional strap offers full flexibility to attach the UROSID 2000 to all patient beds.

Indwelling time: up to 14 days

Main materials

Components	Material
Bag	Polyvinylchloride (PVC)
Cross valve	ABS, PE, PVC
Tube	PVC
Tube- and Bed Sheet Clamp	ABS
Holder	PP

Pack factor

Refer to the reference section

Packaging

Double sterile peel pouch

0123

Latex Free

Revision: 9 Document Title: FINT.441 - Technical sheet Document Number: EU1-00004-F-00025

Legal Manufacturer

CONOD Medical Co., Limited
No. 11 Hongfeng Road, Baimao Industrial Park, Guli Town
215532 Changshu City, Jiangsu Province
PEOPLE'S REPUBLIC OF CHINA
In compliance with ISO13485

Regulation

In compliance with Medical Devices Regulation 2017/745
MD Class- I sterile

•Please refer to complete labeling before using the product.

Other Information

Shelf life: 5 years
Storage: 5°C to 30°C, in a dry place, away from sunlight
Free from natural rubber latex
Disposable product
Not reusable
